 # 340 Name: **Brush Hog** Cause: **Human** Admin: **DOT**

Narrative: A DOT flagger reported a fire that was reportedly out, to a forestry IC who was driving through the area in an AOV. The fire was started by a spark from a brush hog. The operator immediately extinguished the fire, which happened on 6/8.  
 Further investigation confirmed that forestry had not yet cold trailed the fire. While enroute to home unit during a driving mission the IC discovered that action had been taken on the fire, but it had been capped with muskeg and heat remained in the burned area.  
 1 DOF engine responded from the core area at 1927, 3 SOB.

Narrative: The return of warmer temperatures and lower RHs, steep terrain and limited access are hampering control efforts.

Fire activity increased in the afternoon. Helicopters made bucket drops, 1 airtanker and 2 CL215s were used on the fire. Crews are making good progress on direct line construction north of the Chatanika River. Crews on the west flank continue to build direct line toward the Hard Luck Fire scar. Contingency lines were finished south of Hayes Creek Subdivision in the Hayes Creek drainage. The fire loaned Fairbanks Area Forestry a medium helicopter for Initial Attack to cover for their helicopter that went out of service.

Crews on the west flank will continue to build and secure line from H-20 west toward the Hard Luck Fire scar. Direct line will be constructed on the south flank north of the Chatanika River.

Contingency lines were finished south of the Hayes Creek Subdivision in the Hayes Creek drainage. Plans are underway to host a field deliverable S-420 Command and General Staff course.

Narrative: Minimal fire behavior; smoldering, jackpot burning and deep duff burning were observed today. Low clouds and smoke inhibited air operations and visibility for part of the day, however, the entire perimeter was flown and acreage increase is the result of better mapping at the front end of the fire. The fire is 12% contained and minimal fire spread is anticipated. Actions planned for 6/11 are to continue perimeter control to the north of the south fork of Goodpasture River. Crews will also work to secure and mop-up the perimeter south of the river. Palm IRs with operators have been ordered to help identify hidden hot spots near the fire perimeter (+6,510).
