Narrative: Thunderstorm, steep terrain and limited access are hampering control efforts. Today`s observed fire behavior was smoldering and creeping ground fire.

Given the current pattern of wet thundershowers, the fire has received .4" of precipitation on 6/13 and .1" on 6/14. Crews are going direct along all flanks. A helispot was established in Div. The Field deliverable session of S-420 continues.

Crews on the west flank will continue to build and secure line from H-20 north toward Washington Creek. Two crews will be flown down to Washington Creek to start building direct line up toward H-20. Mop-up will continue on the northeast flank and West along Washington Creek. Crews on the north flank along Washington Creek will hot spot and extinguish areas as located near the fire`s lower extension along the creek bottom to take advantage of weather conditions. Crews will continue to remove equipment along Chatanika River.
