PNF4D8	Legal: 002N 003W 7 F		Out Date:	Owner: STA
# 271	Name: Hastings		Cause: Unknown	Admin: L&W

Narrative: Minimal movement or spread is expected at this stage of the fire. During the initial stages of the fire there were over 400 residences at risk. Until the fire is contained and controlled some residences are still at risk, though slight.

Today`s observed fire behavior was smoldering and creeping ground fire

With the pattern of wet thunderstorms crews are going direct along all flanks. A helispot was established in Div. C at the western perimeter of the fire approximately half way up from Washington Creek where 3 crews were inserted. Work has been complete in Divs B, U and T so crews are being shifted to other divisions. Equipment and supplies that are no longer needed for the fire from other divisions are being removed. The Field deliverable session of S-420 finished up today. Fire suppression repair work is being evaluated on parts of the fire.

Crews on the west flank will continue to build and secure line from H-20 north toward Washington Creek. Three crews at helispot H-30 are building direct line up toward H-20 and down to the river. Mop-up will continue on the East flank. Crews will continue rehab on the cat line down to Washington Creek. Crews will continue to remove equipment along Chatanika River. The Green Team (IMT) will assume command of the fire at 0600.
