A Type 3 Incident Management Organization assumed command at 0800. Additional crews and overhead arrived. Lower temperatures, higher humidity, cloud cover, and light precipitation moderated fire activity. This allowed crews to direct attack, and establish an anchor point on the southwest flank of the fire, closest to the Alaska Highway and threatened structures, which remains the priority flank on the fire. Structure assessments and protection set-up continued between mile posts 1279-1282 of the Alaska Highway. The nearest fire perimeter remains 1 mile north of the highway. Helibase and logistics were moved to Northway airport. Tomorrow crews will continue direct attack on the fire, and engines will continue with structure assessment and protection work along the highway corridor.
