Routine monitoring on 6/29 observed one small column. A Lake Clark Ranger reported increased winds blowing smoke across Lake Clark which prompted another flight 6/30. Detection reported 50 acres active (Rank 2) on the NW perimeter pushing NW towards Lake Clark. Fire appears unlikely to cross (S) of Currant Creek. Fire is starting to burn into a wetter hardwood fuel type. Except for smoke, no immediate threat to the residents or property appears likely. Will continue to monitor.
