The increase of temperature, along with decreasing humidity, tested completed containment lines. Increased fire intensity limited planned direct line construction. Intensified fire behavior restricted suppression efforts to indirect line construction and aerial retardant application. Smoke drift continues to impact Eielson AFB and Fairbanks International Airport. Difficulty of terrain necessitates the utilization of Critically Needed Type 1 Hand Crews for direct line construction as well as Dozers for indirect line construction.

The fire was active today with moderate rates of spread, crowning, spotting, and group tree torching on the north flank's steeper slopes and heavier fuels. IHCs and White Mountain continued to build sawline along the northwest flank. CL-215s and Blackhawks supported line construction. Crews continued to mop up along saw and dozerline on the southern flank.

The southwest and west flanks of the fire backed actively today toward the Tanana River. Crews continued to mop up the southeast corner of the fire and protect structures on the east side of the river. Progress was made on prepping structures and installing sprinklers in Mansfield Village. Smokejumpers were deployed on the northeast perimeter near Mansfield to secure the fire's edge and construct a helispot. CL-215s and helicopters worked the fire again today. The decrease in estimated acreage is due to more accurate mapping.
