The later part of the afternoon saw substantial drying to the fire area. This helped show smokes along and within the perimeter particularly on the northeast section in Divisions S and A. This area still has two spots across the South Fork of the Chena. One spot is contained and mopped up at 30 acres while the 100 acre spot is contained but has interior heat. Single tree torching appeared soon after the skies cleared. This northeast perimeter still harbors heat throughout as this was the last area of fire movement and is located within extensive black spruce stands. Firebird Spike Camp was reduced to a staging area.
