The fire was reported by Palmer 911 as a fire in a back yard with spread to wildlands. Two forestry engines, prevention, Palmer FD, and Central FD responded. Upon arrival, the adjacent structure was found to be 50% involved with 0.1 acre wildland involvement in grass. The structure fire department personnel took action on the structure fire while Forestry took action on the wildland involvement. The wildland portion was gridded. It was contained, controlled, and called out. The cause of the fire is still under investigation by the structure fire department. The structure was a total loss.

The day's weather again provided ample opportunity for drying, exceeding the predicted temperatures and relative humidity. Single tree torching is visible but a rare occasion. USAF and US Army activity on the south side of the incident received initial approval entry. Power lines on the south end were energized. Contractor improvements such as road work and electrical surveys were performed by Range Control.

The fire was flown early in the day by aircraft 999FG. One smoke was observed on the far northwest edge of the fire. Dispatch received multiple calls of smoke reported in the vicinity of the fire later in the day. 999FG flew the fire again and reported an increase in fire behavior. The fire had a 2 acre, open flame spot that was putting off a smoke column. The winds were out of the west pushing the fire up the valley, and upslope towards an already burnt area. Plans are to continue working with Lake Clark National Park Service, and continue monitoring the fire.
