Fire personnel took advantage of high fuel moistures from numerous rain showers in the past two days to secure critical sections of fireline in advance of hot, windy weather predicted for the area. The management objective is to prevent fire spread toward values at risk while allowing it the fire to burn naturally to the north. Crews continue to work to secure the eastern flank of the fire to prevent growth toward Mansfield Lake Village. Mop up continued in pockets of heat in white spruce along the Tanana River and on portions of the northern edge of the fire. Blown down timber from last years wind storm continues to present a challenge for fire personnel.
