FS LEO responded to a report of a fire along the Glacier Hwy. Upon arrival FS LEO notified FS Fire personnel and reported a fair amount of a smoke drifting on to the highway. Engine 533 responded and FS personnel commenced suppression action with the use of pumps and hand tools. At 1700 FS personnel determined this fire to be contained.

Fire personnel on NPS ship 191 reported a 60% active perimeter at 1030. Fire behavior was smoldering and backing with isolated torching in black spruce, tundra, tussock tundra, and hardwood mix. Direction of spread was to the north in the flats. Winds were to the south 30 mph with 90% cloud cover and no precipitation. Four smokejumpers were demobed off the fire with helicopter 920 and replaced with a 5 person squad. Fire personnel continue to secure the line around the cabin.

#280 Owner: MIL Admin: ARMY-U.S. Army
Name: **Stuart Creek 2** Cause: Human

Temperatures and humidity moderated fire activity due to a heavy inversion and trace precipitation. Smoke reduced visibility, limiting flight opportunities and aerial monitoring until late in the shift. The evening fire behavior was observed as open flame backing actively in green hardwood stands. Continued monitoring will be essential to evaluate trigger points for future suppression efforts. Part of the Midnight Sun IHC mopped up areas of heat near containment lines in Division M. The remainder of the crew prepped military assets and tested hydraulics at multiple locations in Division B. Engines patrolled Quarry and Brigadier Roads in Division C. Various military sites in and around the Impact Area remain threatened, and aerial and ground-based military training exercises are requiring extensive coordination. An incoming Airspace Coordinator will facilitate airspace issues between the incident and military beginning 8/10. The Midnight Sun IHC will demob 8/10. A TFR remains in place.

The fire is now being managed by a Type 3 organization. The Alaska Type 1 Team has been ordered for 8/9/13. The fire has escaped military restricted area, threatening numerous structures and state timber units. Observed fire behavior was running, spotting and torching. The fire has moved out of old growth timber and into open tundra, spruce and hardwoods. The fire is wind driven. Large growth is expected as weather conditions remain hot, dry and windy. Pioneer Peak IHC and 8 smokejumpers were deployed for cabin protection. Firefighters will continue to do site protection and to utilize air resources to slow the spread north. Chena IHC were reassigned to this fire.

Delta #2 made good progress today securing the west side of the finger in Section 24. Buckets were used to support the crew and knock down heat at the northern tip of the finger. Cloud cover obscured the fire during the early AM NIROPS IR mission and no data was returned. The fire continues to creep uphill on the northeast corner. There was no column today, but considerable smoke is drifting towards Chicken.
