A passing aircraft reported a smoke just off the Alaska Hwy. Two engines and helio 212HL were dispatched. Helitack was deployed. Due to very deep burning, 212HL assisted suppression with bucket work. ATVs with Fedcos were also sent to the fire. Preliminary investigation indicates ignition from an equipment source such as an ATV exhaust. The fire was worked until midnight. The IC plus two stayed on scene overnight and will resume suppression in the morning.

## Staffed - AFS

The fire grew to the west and northwest. Crews held line in DIVS Z and continued to construct line in DIVS A and Y to construct direct line to support the CL215's. Firefighters will continue to construct and hold line. This fire is staffed with 5 Type 2 crews and several overhead. Lack of resources hindering line construction progress.

#280 Owner: MIL Admin: ARMY-U.S. Army  
Name: **Stuart Creek 2** Cause: Human

Temperatures and humidity along with a trace of precipitation moderated fire activity during the morning hours. The fire actively crept through hardwood stands and remained active throughout the day, accelerating when the inversion lifted. Gusty winds occurred over the fire area and increased fire behavior in the Stuart Creek drainage. Division M remained staffed with resources who cut out and mopped up hotspots along the fires edge. Aerial resources were utilized for recon and bucket work on hotspots with potential to threaten line containment. Division C patrolled Quarry and Brigadier Roads and monitored fire progression in the Stuart Creek drainage. Resources also tested site protection and water shuttling methods on military assets. Various military sites in and around the Impact Area remain threatened. Aerial and ground-based military training exercises are requiring extensive coordination by the IMT and military contacts. The Midnight Sun IHC was demobed and were replaced by the North Star Fire Crew. A TFR remains in place.

The fire is now being managed by an Alaska Type 1 organization. The fire has escaped military restricted area, threatening numerous structures and state timber units. Observed fire behavior was running, spotting and torching. The fire has moved out of old growth timber and into open tundra, spruce and hardwoods. The fire is wind driven. Large growth is expected as weather conditions remain hot, dry and windy. Pioneer Peak IHC and 8 smokejumpers were deployed for cabin protection. Firefighters will continue to do site protection and to utilize air resources to slow the spread north. There are two hotshot crews, 2 Type 2 crews, 3 engines and several overhead assigned to this fire.
