Name: **Crater Creek** Cause: Human

Today the fire behavior was creeping and smoldering. The fire is in a big bowl with steep terrain causing erratic winds. The steep terrain and dry fuels are dictating the use of suppression crews at this time. Difficult steep terrain will continue to be a safety concern for the type 2 crews. Bears have become a nuisance around camp and on the fireline.

The observed fire behavior was creeping and smoldering with a low rate of spread in the black spruce. Multiple structures and the community of Circle Hot Springs are threatened by the fire. The weather is unseasonably warm and dry with high winds. Also, the fuels are abnormally dry. Today fire personnel constructed indirect line for protection of Circle Hot Springs. There was minimal fire growth today.

An area of heat threatening containment was spotted in Division R, near the Chena River, during an aerial recon on 8/13. The division was re-staffed with a crew, who worked with helicopter bucket support to secure the area. A crew continued gridding and mop-up in Division M. Various military sites in and around the Impact Area remain threatened. Extreme fuel moisture indices are continuing to promote re-burn in deep duff layers, and extensive mop-up is required. IR (infra red) flight is scheduled for the night of 8/14. Evaluation of the IR data will aid in determining future resource allocation and staffing needs for the incident. Acreage increase will be calculated 8/15. A TFR remains in place.

Today a strong inversion and heavy smoke were observed until 1200. Continued growth can be expected as weather remains hot, dry and windy. Backing was exhibited along the southwestern and western perimeters with an increase in wind velocity from the west. The most significant fire behavior was along the east flank, northeast corner and Rainbow Lake, with single tree torching and short runs observed with steady wind from the west.

The fire made a significant run to the southeast driven by strong northwest winds gaining 4000 acres and now has the potential to threaten values along the Alaska Highway. Dense smoke from fires to the north hampered aviation operations. The handcrews made good progress securing the northwest corner of the fire.
