Much of the perimeter remains sheltered in both hardwoods and spruce understory. Expect limited growth until fire weather indices increase. Creeping and smoldering throughout the fire area today due to high Duff Moisture Code (DMC) and Drought Code (DC) values. Mop-up remains difficult due to extremely dry deep duff layers. Crews continued to secure the northern most section of the fire to protect Whitestone as well as other values at risk to the north.

#414	Owner: NCA		Admin: Tetlin	
	Name: <b>Tetlin Jct Ridge</b>		Cause: Lightning	

Rain fell on the fire through most of the day and fire behavior was minimal with only smoldering observed. Fog at 3000 feet prevented aircraft from flying the fire. Planning for cutting sawline to the repeater site across the ridge on the border of Tetlin Corporation land was completed and implementation will begin on Monday. The engine taskforce on loan returned to the Mississippi fire and the second taskforce demobed at end of shift having completed structure preparations. Two helicopters and associated aviation personnel were demobed and full demob is tentatively planned for the end of the week.
