Much of the perimeter remains sheltered in both hardwood and spruce understory. Expect limited growth as fire weather indices have decreased. Creeping and smoldering throughout the fire area. Duff Moisture Codes and Drought Codes remain in the extreme range. Mop-up remains difficult due to extremely dry deep duff layers. The fire activity has picked up due to partly sunny skies and drier weather, with isolated pockets of activity. NIROPS infrared detection flight showed heat along all perimeters of the fire. Demobilization of resources continues.
