9VS did two recon flights over the Oklahoma Range within the DTA West. The prescribed fire was observed actively burning in the tundra in the Oklahoma and Arizona impact areas to the west and backing in the spruce with some single tree torching. H-6LE and H-1KA provided support with bucket work along 100 Mile Creek where 3 spots had been observed on the east side of the creek. Minimal smoke observed along 100 Mile Creek. Major smoky conditions from the interior prevented an updated acreage assessment.
