The Funny River Fire's size has increased to over 20,000 acres. Current IC's strategic objective is to establish line from the heel and monitor the line at the head of the fire. The incoming IC of the Alaska T2 Long Team's objectives are to contain the northeast side of the fire and the 2nd priority is to start construction and aerial drops of either water or retardant on the west flank of the fire down to Tustumena Lake. Current IC's critical resource needs are 5 hot shot crews; 8 dozers with operators, heavy equipment bosses and transports; 10 T2 crews with 5 Strike Team Leader Crews; and ducks (water scooping planes) are a must, as they can utilize the Tustumena Lake to dip from. Low RH's combined with high winds, and competing nearby fires stretching ground and aerial resources thin are making containment difficult.
