**Cause**

Human

The fire was reported by a private party as a tow truck on fire with surrounding wildlands also on fire outside of the service area. Two Forestry engines, one Prevention, one operations, and helitack 633 responded. Upon arrival of helitack 633, they found minimal wildland involvement and cancelled one engine, Prevention, and operations. The engine that continued found a 0.1 acre smoldering fire in mixed fuels. The fire was contained, controlled, and put in monitor status.
The fire received a 1/4 inch of rain overnight which aided personnel in securing the allotment and mopping up 100 feet in. Tomorrow personnel will continue mopping up to 200 feet in, and begin to prepare for a Wednesday demobilization. The fire had pockets of significant heat, and with warm, dry and windy weather, it will continue moving to the NW, however the allotment should be secure. The fire decreased in size due to more accurate mapping.

Crews continued to secure the northeast side of the fire. Burn out operations were conducted on the southeast with support from T-260. The fire received moderate rain. Chena and Pioneer crews will continue to patrol and mop-up with support from T-260 and Gannett Glacier will be released.

Fire personnel continued to patrol and monitor the fire for any smokes. The Yukon Crew was demobilized today, and the tentative plan for tomorrow is to release the rest of the personnel.

The fire received some rain and demobilization is being planned for 6/10.
These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
