Fire activity was moderate today due to wetting rains over the incident from the past two days. However numerous smokes along the western and southern flanks of the fire were observed including many along the perimeter with active flames visible. A Type 3 helicopter assisted fire personnel to deliver and set up a repeater for improved communication. Sprinkler kits were put into place for structure protection on remote permitted cabins being threatened by the fire. The plan for tomorrow is to install another weather station, continue structure protection, and monitor the growth and direction of the fire.
