A positive lightning strike was spotted by the Forestry Lookout. Helitack was en route back to Tok Forestry and was diverted to get a look at the strike. Helitack spotted a fire burning in dead and down timber. Two engines and a dozer were dispatched to the fire. Helitack started bucket operations while Firefighters and the dozer cut in an access road and line around the fire. IA personal will continued working on containing the fire. The IC called the fire contained and controlled and left in monitor status for the night. A squad with an engine will continue to work the fire in the morning.

 Name: **Juneau Lake** Cause: Lightning

Fire is believed to be caused by lightening and was reported by Alaska State Troopers. It was seen to be burning in mixed black spruce and hemlock near treeline with a 100 percent active fire perimeter. State resources initially responded with a helitack crew, bucket work and a scooper, then transitioned to Forest Service personell who will do point structure protection. The fire currently threatens two Forest Service recreational cabins.

The fire was reported by T-52 and Air Attack 0AK was in the area and responded. The fire was approximately 2 acres in size, rank 2 burning in grass and tundra with reported 35 mile per hour winds and potential to move south into heavy unpredictable fuels. There was one structure approximately 2.5 miles south of the fire. The fire plotted in Limited suppression management area and due to the impending weather forecasts and potential wind shift that could send the fire towards a cabin, it was determined action needed to be taken. T-55 and T-160 dropped retardent around the cabin and boxed it in. The fire will be checked the next operational period.

The fire was reported to State Troopers by a call from the public. It is burning in mountain hemlock and spruce in very steep terrain, with active fire behavior and a 100 percent active fire perimeter. Erratic winds fueled rapid growth of fire. State resources did initial size up then transferred control to Forest Service. The fire currently threatens residences and businesses along the Sterling Hwy. A Forest Service IA crew and VFD engines are working night shift to perform structure protection on threatened buildings.

 #292 Owner: Tribal Unit: AKCIN-Cook Inlet Region, Incorporated
 Name: **Card Street** Cause: Human

The Card Street Fire's size increased to 2,574 acres as of 18:00. Current strategic objectives are to: continue building direct fire line south of Card and Zenith Streets at the heel of the fire; limit fire growth on the western side of the fire near Feuding Lane; and prevent spot fires from getting established on the south side across the Kenai River. Heavy emphasis is on protecting the Kenai Keyes subdivision with personnel working around the clock on structure protection.

The fire exhibited long-range spotting and torching as it moved to the west-southwest with plume-dominated growth at the end of the day. Late in the burn period there was a wind shift out of the east that pushed the fire back towards Kenai Keyes Subdivision. The southeast corner of the Kenai Keyes Subdivision was heavily impacted by rank 6 crown fire. At the time of this report, personnel were re-entering the subdivision to work on spot fires and did not have an exact assessment of fire's impact on the southeast corner of the subdivision. Smokejumpers were assisting with subdivision structure protection. Once the jumpers are done assisting, the plan is for them to travel via boat down the Kenai River to check out possible spot fires on the south side of the Kenai River.

Crews continued to work to secure the fire along the southern and western perimeter. Strong northwest winds challenged the fire's southern perimeter so water scooping aircraft and helicopter bucket drops were used to prevent spotting across the river to the south. Crews were able to use airboats to gain access to some portions of the fire. Critical overhead positions are being filled and are beginning to arrive at the fire. A type 3 helicopter was assigned to the fire. Fire personnel assisted the Tok area with initial attack of a new fire. Despite strong winds and overextended ground forces crews managed to minimize fire growth to about 50 acres.

The Alaska Type 1 IMT assumed command of the fire at 0700. Fire was active in the interior and in various places along the perimeter, exhibiting short runs in the spruce and short range spotting from group torching. There was no major growth in the perimeter today. Fire personnel continued to secure the perimeter on all flanks. Evacuation of affected communities remained in place. Small burnouts were conducted in advantageous terrain to defend structures from uncontrolled fire. All burnouts were successful. Six additional crews and water handling apparatus will help bolster efforts for tomorrow.

Logan, Vale, Boise, Entiat, Mt. Baker, Bitterroot, Lewis & Clark, Flathead, Idaho Panhandle, and Helena IHC's all assigned to the fire,

Fire intensity increased today along the majority of the perimeter and interior. This surge in activity was caused by sustained, moderate winds with strong gusts. Small runs and group torching were observed with continuous and uninterrupted backing. Due to fires in the area and lack of resources the helicopter was pulled back to Forestry during a recon. Updated acreage was not documented. Tomorrow's plan will consist of RAWs maintenance, a mapping mission, and more structure protection around remote cabins while monitoring growth and spread of the fire.
