The fire was called into dispatch at 0917 by Flight Services. J-17 was dispatched to the fire and reported it to be 30 acres with a 50% active perimeter. Initial fire activity included creeping and backing in tundra. Creeks were observed to the west and north side of the fire. At 1555, surveillance aircraft 4MN did a recon of the fire and reported it to be 65% active with continued backing and creeping in tundra and a couple stringers of black spruce. The fire had grown to 200 acres and was moving at a rate of 10 chains per hour to the south/southwest. The fire plots in a Limited suppression management area and has been placed in monitor status.

 Name: **Card Street** Cause: Human

Crews continued to secure control lines today in Division A and continued mopping up and patrolling around structures in the Kenai Keyes subdivision, Feuding Lane, Zenith Street and Card Street. Division D also continued mop up and worked on active fire in pockets of spruce in parts of the division. Division K continued to secure their control lines with an extensive plumbing show of hose lays and completed an estimated two miles of plumbing in preparation for heavy mop up. Firing operations in Division M yesterday did not go as well as planned and will consider another attempt when the fuels dry out in a couple days. This will tie the control line to Skilak Lake. Structure protection continues with the complexities of the Wildland Urban Interface which requires the skill of the Type 1 and Type 2 hand crews but the evacuations have been lifted, allowing residents to return home. The fire size remains 7657 acres with the acres again verified with a GPS flight by the Situation Unit Leader and FBAN. Minimal Fire behavior today as the marine layer allowed for good humidity recovery overnight and also into the daytime as the sun was unable to break the cloud layer. Today's weather limited fire behavior to smoldering and creeping fire with an occasional single tree torching.

Isolated and group torching in spruce were observed on the western portion of the fire with smoldering ground fuels throughout the interior under lower temperatures and higher RHs today. Crews continued securing the edge and around structures, for a total containment of 53% by the end of shift. The evacuation order was lifted at the end of shift, with checkpoints and traffic control remaining in place until 6/22. One IHC and one Type 2 IA crew were released to help with efforts on new starts in the Fairbanks area. With the cooler weather, crews and engines are expected to make good progress as they continue to secure the fire edge tomorrow.

 Name: **Chisana River 2** Cause: Lightning

The fire was extremely active today, making a substantial push to the southwest consuming over 10,000 acres. Large runs are plotting up to a quarter mile, including over the Chisana River, with miles of continuous uninterrupted backing. We inserted 2 people to spike out at yet another permitted cabin. We mapped the fire at 29,889 acres and shuttled supplies to both spike camps. A transition took place today from a Type 4 to a Type 3 incident. Tomorrow, the mission includes more recon, structure protection, a mapping mission, and preparation for a possible burn out. We expect the fire to reach a couple of the permitted cabins in the next 24 to 48 hours.

Fire personnel were able to lay hose around the west side of the fire, connecting a series of lakes to a slough on the northern end of the fire. PSD operations were utilized to burn the west side of yesterdays slop over. The northern slop made a run to the northeast. Plans for tomorrow are to evaluate fire progression on the east side of the north slop, and plan for potential opportunities to guide the fire with PSD operations while utilizing natural water barriers. Current projected forecasts call for a north wind, which will ease the team with their burn operations. Nikolai crew was demobilized off the fire today.
