BD 840AK flew the fire and H-361EH was utilized for bucket work near the fire's perimeter. Resources continued burning out pockets of unburned fuel to clean up yesterday's burnout operations. Crews extinguished small spots within Nulato and continue to strengthen the black line around town. Weather observed was clear skies but smoky most of the day with moderate fire behavior of group and single tree torching occurring as the fire grew to the North today, pushing it away from Nulato. The fire is estimated at 1200 acres. The airstrip will be temporarily closed while the fire moves through that area.

6-22-15

Crews in all divisions continued their work today as they have and made good headway in mop up, gridding, patrolling and securing all control lines. Fire behavior did pick up today as predicted today with early cloud cover burning off by mid-morning. Fire behavior is again expected to increase over the next couple days with the warming trend with continued temperatures in the mid to upper 70's, lower humidity's and a slight increase in wind over the fire area. This will again result in a potential for single and group tree torching along with the possibility of creeping fires carrying more over the next couple days. Concerns remain with the buildup index becoming high to extreme and the same for the drought code. Indices will continue to rise incrementally which may become problematic in areas of the fire if conditions continue to change. The attempt of pulling off a burning operation was not successful and scrubbed as fuels did not hit prescription and decided not to make a mess and eliminate options for tomorrow. Structure protection continues with the complexities of the Wildland Urban Interface.

Detection aircraft 1010F flew the fire and reported that the fire made a significant run due to a north-northwest wind that pushed it onto a ridgetop. The fire was 3 miles away from Chuathbulak, with continuous fuels between the town and the fire. Helena crew were being shuttled to Chuathbulak to provide point protection, but had to turn around due to bad weather. Towards the end of the night the fire was receiving heavy precipitation, and will be monitored tomorrow.

The fire was flown by detection aircraft N-249CP. The fire was 3000 acres, burning across level terrain in grass and 100% active. The detection ship reported structures on an island 1 mile away but the fire was not burning in the direction of the structures. Due to higher priority fires and limited resources no further action was taken. The fire will continue to be monitored.
