This was reported as a fire in the ditch on the side of the road. Two Forestry engines, Prevention, and Butte FD responded. Upon arrival of one Forestry engine and Prevention they found an escaped burn barrel fire smoldering at 0.1 acres. The other Forestry engine was released and the personnel on scene took action on the fire containing and controlling it.

 Name: **Red Devil** Cause: Lightning

The fire received precipitation throughout the night, and into the morning. Due to the increased moisture, crews were able to continue direct attack on the fire. Containment on the fire is now at 40%, and full containment is expected in a couple days. J-07 and J-17 each provided one drop of paracargo to ground personnel, and the Idaho Panhandle IHC were mobilized into place. An updated map is being processed.

511613 Lon: **146:14:27.0** Personnel: **2** Start Date: 6/24/15 Area: **FAS**
 Legal: 004N 007E 25 F Out Date:
 #613 Owner: State Unit: AKAKS-Alaska DNR Other
 Name: **West Fork** Cause: Lightning

The Alaska T2 Incident Management Team strategic plans are to minimize spread of the fire down the West Fork Drainage limiting acreage growth. Continue to assess structure protection needs in the West Fork Drainage and develop plans for suppression as weather and fire behavior allow. Moderate weather is keeping fire growth to a minimum. Currently there has been no impact to residents along the Chena Hot Springs Road. Anaconda Fire P.I.O's will continue providing the residents and local business information on the fires status.

Name: **Iditarod River** Cause: Lightning

Cooler weather helped moderate the fire, however the fire did make short runs at multiple times through-out the day. Fire personnel continued prepping around the occupied cabins, and also around the town of Flat. When the weather allows, a burn out operation will take place around the cemetery. Pumps and hose were slung into Flat today from Iditarod, and fire personnel will now be able to finish establishing hose lay around Flat. Four jumpers were demobilized from the fire.

Crews in all divisions continued their work today mopping up, gridding, patrolling and securing all control lines. The forecast for tomorrow calls for a 10% chance of wetting rain which will continue minimal fire behavior giving firefighters more opportunity to meet their suppression objectives. Mop up and patrolling around the structures is ongoing and Structure protection continues with the complexities of the Wildland Urban Interface. Crews continued pulling hose and equipment off the line today and back hauling everything back to the ICP and this will be the plan for the next few days. Rehab has begun on the dozer lines and other areas of the fire. The fire size remains 8876 acres. We have had several resources re-assigned over the past few days and we will continue to right size the incident personnel to meet the needs.

The fire transitioned from ICT1 to ICT3 at 0700 on 6/27. Personnel will continue to work towards 100% containment while ensuring protection of stuctures within the fire perimeter. The north division completed gridding today and the north zone was placed into patrol and monitor status. The south division continued to mop up berm rows and isolated interior heat. The planned actions for the next operational period is to continue patrolling the North Division, continue mopping up berms and interior heat in the south division, and keep the structure group patrolling during the night.

Moderate fire behavior was observed with creeping ground fire. Isolated crown torching was observed on all sides of the fire, with the highest concentration of heat on the northern end of the fire. Showers and high relative humidity limited the activity of the fire. Plan for next operational period is to continue point protection and to monitor the progress of the burn toward management action points.

4MN flew recon over this fire today. Updated acres to 24,134. They also deduced that this fire and Fire 340 have burned together, thus updating both of the fires acres, respectively. Fire 539 has a 50% active perimeter, with light, variable winds. Observations also included creeping, backing, single torching, and 5-10 ft flame lengths. Additionally the fire is active with backing and flanking with isolated group torching. The fire is fuel driven with most of the activity in heavier fuel concentration. The fire remains in monitor status. Acreage will be updated accordingly.

4MN flew recon over this fire today. Updated acres to 56,687. They also deduced that this fire and Fire 539 have burned together, thus updating both of the fires acres, respectively. Fire 539 has a 50% active perimeter, with light, variable winds. Observations also included creeping, backing, single torching, and 5-10 ft flame lengths. Additionally the fire is active with backing and flanking with isolated group torching. The fire is fuel driven with most of the activity in heavier fuel concentration. The fire remains in monitor status. Acreage will be updated accordingly.
