Fire personnel continued suppression efforts on the fire throughout the night. Do to characteristics of the fire, T-260 was launched from McGrath to provide aerial support. Detection aircraft 909AK flew the fire at 1320 and reported it was 100 acres, burning in black spruce and tundra with continuous fuels. J-17 provided para-cargo in the afternoon, and H-392NS provided the IC with a recon flight. Resources were concentrating efforts on the north and southeast flanks of the fire, and containment was at 40% by 1711.

 #539 Owner: USFWS Unit: AKKUR-Koyukuk National Wildlife Refuge
 Name: **Holtnakatna** Cause: Lightning

4MN flew this fire today with the following observations. The perimeter is 20% active, smoldering, backing, running, and group torching. The fire is stringing its way between lakes and wetlands on the south and SW portions. Fire is backing aggressively through black spruce to the north and NW. East perimeters were too smoky to accurately observe. J-66 responded and deployed a total of six smokejumpers on three cabins today. Smokejumpers worked to assess and prepare structures for potential burnout operations if necessary. H-361EH delivered supplies to support structure protection preparation and demobilized two smokejumpers and two firefighters.

Low fire behavior with smoldering, creeping in surface fuels and occasional torching in black spruce. Extensive areas along the fire perimeter and within the interior contain heat with limited active burning. Considerable sunshine and reduced area smoke contributed to temperatures in the low 70's and relative humidity in the 30 to 40% range.

Structure protection was completed around one cabin with the helitak load. Other known values at risk were surveyed and plans were developed for setting up protection around these points. Continued work will be based upon helicopter availability. Currently the DAF initial attack ship is supporting the incident.

Isolated interior group tree torching. Continued progress on containment lines will secure the area of the fire adjacent to the town of Northway. If significant fire growth occurs, the fire may impact the Alaska Highway and additional residences. A structure assessment is currently on-going and will determine the status of additional threats to safety if significant fire growth occurs. The plan for the next operational period is to continue to secure area around threatened structures, identify and assess future threats to private property and structures. Continue to mop up and rehabilitate line on north and northeast sides of fire.

J-66 deployed 2 smokejumpers on the Tripod Flats cabin and 4 smokejumpers on the 20 mile cabin. The smokejumpers at the Tripod Flats cabin completed a burn out operation, creating a good buffer around the cabin, and will continue to secure the cabin. The smokejumpers on the 20 mile cabin worked to reduce fuels around the cabin and improve a helispot. A plan and map was made for hose and sprinkler set up if a burn out operation should become necessary at the 20 mile cabin.

Crews continued their work today patrolling and securing all control lines. The forecast for tomorrow calls for a chance of wetting rain which will continue minimal fire behavior giving firefighters more opportunity to meet their suppression objectives. Personnel continue patrolling around structures and in other divisions of the fire. Personnel continue pulling hose and equipment off the line and backhauling everything to the ICP; this will be an ongoing task for the next few days. Rehab has begun on the dozer lines and other areas of the fire. The fire will transition to a Type 3 fire on Thursday, July 2nd.

4MN flew recon on this fire today and observed the following. Currently has a 60% active perimeter, with a light and variable wind. The fire is backing and flanking in all directions except for the east, where it is hung up on the Little Mud. FWS Field Camp 63 38.36 x 158 01.78, is about five miles south. Fire will easily spread to within one mile before it hits a large oxbow lake and some spruce/hardwoods fuels, which is surrounding the field camp. Aerial Observer estimates two days to the lake.

The fire was flown by detection aircraft 909AK who confirmed that the fire has merged with fire 631. The fire was 5 percent active on the southeast, burning in mixed hardwood and blackspruce. On the west edge of the fire, the fuels were continues, and there were a couple smoldering spot fires off of the main one. Combined acreage of fire 631 and 633 was approximately 400 acres. All reports will now be reported under 633.

Name: **Little Mud River** Cause: Lightning

4MN flew recon on this fire today and observed a 30% active perimeter, with smoldering, creeping, backing, and group torching characteristics. Fuels involved were black spruce on a flat rolling terrain. The fire is backing and flanking in all directions, except N/NE, where a creek drainage (Little Mud) has held it up.

4MN observed this fire with a 40% active perimeter, with smoldering, creeping, backing, running, torching, and continuous crowning. Fuels burning involve black spruce, and spruce/hardwood mix. There is a pocket of activity on the south end of the fire backing into an old burn scar in the hills. Most of the NE corner of the fire is a continuous crown fire moving to the NE.

4MN flew this fire today and observed a 50% active perimeter with smoldering, creeping, backing, and group torching. Fuels involved are grass and a hardwood mix. Winds were light out of the S/SW, on a flat terrain. The fire is stringing itself between lakes and wetlands to the S/SW, and will likely join fire 565. It is backing to the west, and to the north is mostly being checked by a series of lakes. 6/29

4MN flew this fire today and observed a 50% active perimeter with smoldering, creeping, backing, and group torching. Fuels involved are grass and a hardwood mix. Winds were light out of the S/SW, on a flat terrain. The fire is stringing itself between lakes and wetlands to the S/SW, and will likely join fire 565. It is backing to the west, and to the north is mostly being checked by a series of lakes.

4MN flew recon over this fire today and observed an 80% active perimeter, with smoldering, creeping, backing, running, and group torching characteristics. Fuels were burning in a spruce/hardwood mix on a rolling terrain, with winds out of the SW. The fire has spread north and east along a ridge between the Innoko River and Sucker Creek. It could threaten cabins if it crosses Sucker Creek.
