 #533 Owner: Tribal Unit: AKDYN-Doyon, Limited  
 Name: **Big Creek Two** Cause: Lightning

4MN flew this fire today during their detection flight, and observed some isolated torching on a flat terrain, burning in a spruce/hardwood mix, resulting with the south and west perimeters concurrently burning in said fuels with low intensity. The east side is readily backing into fuels with a higher content of black spruce. There are pockets of heat around the whole perimeter. Active fire growth on the west side of the fire backing into the wind with isolated group torching. The remaining flanks of the fire are less active, primarily backing with flanking fire in continuous fuels. Successful placement of smokeyjumpers near a remote cabin for structure protection; another group of smokeyjumpers was unable to jump into their area due to poor visibility. Firefighters will assess needs for structure protection along the Yukon River from the village of ruby to the Nowitna River. An attempt to place smokeyjumpers near a remote cabin for structure protection will be attempted if visibility allows.

Today's fire behavior was minimal with smoldering, and creeping in surface fuels and occasional torching in black spruce. Extensive areas along the fire perimeter and within the interior contain heat with limited active burning. Cloudy conditions, and dense smoke contributed to temperatures around 60° and relative humidity in the 70-75% range.

4MN flew recon over this fire today, and observed a 20% active perimeter, with creeping, running, and isolated torching. Fuels being consumed are a spruce/hardwood mix, with winds 5-10 mph out of the west. Most of the fires activity is on the upper 1/3 of the ridgetops, where it is being exposed to the west winds.

 #359 Owner: USFWS Unit: AKKUR-Koyukuk National Wildlife Refuge  
 Name: **Three Day** Cause: Lightning

4MN flew the fire today and noted, much of the fire looks to have gotten rain yesterday and is showing little activity. The fire perimeter is 10% active with isolated torching. There is a pocket of heat at the eastern tip and another at the northeastern corner of the sand dunes where it is moving through an old burn scar. The western flank continues to back through spruce and spruce/hardwood fuel. The fire remains in monitor status.
