JV6M	Lat: 60:29:03.7	Status: U/C	Acres: 0.1	Option: CRITICAL
	Lon: 149:43:54.8		Start Date: 7/3/15	Area: CGF
PNJV6M	Legal: 005N 003W 36 S		Out Date:	
#696	Owner: Private	Unit: AKPRI-Private		
	Name: Sunrise			Cause: Human

This fire was reported by Alaska State Troopers as an R.V. on fire that escaped into nearby brush. State Helicopter 212TH, Local VFD, FS Engines 631 and FC-1 responded. It was a vehicle fire that resulted in 3 torched trees. The local VFD knocked the fire down and the I.C. delared it contained at 16:45. Fire is controlled but not called out. Four USFS people responded, but took no action.

The fires showed low to moderated growth today under partly cloudy skies and moderate winds. Single tree, group torching and backing downslope spread was observed. The fires have backed for several days and west strong winds helped burn out fingers of unburned fuels. Smoke was heavy in the morning in the Tanana area with a slight improvement midday. The smoke prevented recon flights until mid to late afternoon which were limited to the south perimeter of the Tozitna fire. It is expected that fire growth will be moderate on all 8 fires within the protected area based on Modis data. Reports received from project managers involved in constructing that Tanan Road from Manley in the area of the Hay Slough fire indicated active fire behavior which caused construction work to be halted and workers to evacuate the area. A public meeting was attended by 30+ residents for the fire updates and the status of protection activities. A safety team from the Multi-Agency Coordinating Group arrived and has been briefed by the Incident Commander.

Note: Staats` IMT managing 9 fires: The Blind River, Spicer, Tonzitna, Harper Bend, Hay Slough, Bering Creek, Moose Point, Jackson, and Kokrine fires. These are referred to as the Tanana Area Fires.

Rainfall over the fire area prevented any active fire behavior. No growth was expected under current weather conditions. A dry period is possible over the July 4th weekend. Two crews were demobed. Back hauling of excess supplies continues. Removing of equipment from Healy Village was initiated. A plan is in development to transition to a type 3 team.

Divisions A and M continue to mop up and patrol. Personnel reconned the fire in Helicopter 212TH and found a few smokes, mostly by Skilak Lake and the southern area by Kenai River. About 5% of the fire will be left in monitor status; this is the area along Kenai River and Skilak Lake, and much of it burned in the 2014 Funny River Fire.

Structure protection continued today in certain areas of the fire. Emphasis on the north end of the fire was placed upon patrolling and rehabilitation of lines. On the southern end of the fire mop up continued with the breaking up of berms and monitoring of hot spots. The removal of structure protection will continue as crews finish up the final stages of mop up.

 Name: **Little Mud River** Cause: Lightning

4MN flew recon over this fire and observed a 5% active perimeter with smoldering, and creeping behavior. Fuels involved are black spruce and tundra. The fire has received precipitation, on the middle 1/3 of a rolling, flat terrain. Appears to be a dirty burn with a few areas of heat holding in the hardwoods. Some spots continue to creep along the perimeter.

Daily Report From: 07/03 **0.0 Acreage Change Since 06/24**

 Name: **Stuyahok River** Cause: Lightning

4MN flew recon over this fire today and observed a 10% active perimeter with creeping, and isolated torching characteristics. Fuels being consumed were black spruce, tundra, and a hardwood mix. Observer reports an increase in acreage. Interior pockets of heat continue to smolder and creep. It appears the fire received precipitation which in turn has slowed the growth potential. Some areas on the perimeter are smoldering.

4MN flew recon over this fire today and observed a 50% active perimeter with smoldering characteristics on a flat, rolling terrain. Fuels being consumed are black spruce, tundra, and a hardwood mix. The fire is 9 miles to the NW, burning to the south of Camp Creek Airstrip. It is smoldering in isolated areas within the fire perimeter. There are pockets of heat in the thicker hardwood mix, and observer reports a low spread potential with cooler temps and recent precipitation. The fire is held in check with numerous oxbows and sloughs limiting the spread potential even more.

4MN flew recon over this fire today, and observed smoldering and creeping behavior on the fire. Fuels being consumed were black spruce, white spruce, tundra, tussock tundra, and a hardwood mix. Fire is burning on the lower 1/3, valley bottom and rolling terrain. The fire is hung up in rolling hills of hardwood mix and tundra. It's burning away from the Yukon River. Some pockets of unburned fuel remain between the fire edge and the Yukon River, and will potentially back down to the river if conditions turn favorable.

4MN flew recon over this incident today and observed a 5% active perimeter, with smoldering and creeping characteristics on a rolling terrain upon the upper, middle, and lower south slopes. There was new growth observed, and the fire had received precipitation. Smoke was visible interior of the fire, and was creeping inside the hardwood stands.
