Fire behavior was minimal with smoldering reported. Winds from the night of the 6th pushed the NW and SW corners of the fire to the NW for an additional 1000 acres. The fire received 1/5 inches of rain on 7/8, so minimal spread is expected.

Some overhead swapping occurred today. 9 additional jumpers were put on the fire. The fire was reconned today and only a couple smokes were showing on the interior. Resources are working to secure the southern flank. The Fort Yukon Crew is working the east side while smokejumpers are gridding the west side.

Abajo and HC3266 Wildfire Modules on scene.

Fire continues backing with single tree and group torching. Some areas of fireline remain active through the daytime burning period. 15-20% of the fire perimeter remains active during daytime hours. Smoldering and creeping fire behavior were observed during night time and early morning hours. Fire behavior will become more active as drying conditions continue. The fire is expected to continue to back eastward towards structures and the Elliott Highway. The fire is approx. 1.5 miles west of the highway. There are planned burnout operations for the Eureka area if weather conditions allow for the next operational shift.

Name: **Spicer Creek** Cause: Lightning

The south and west corners of Spicer Fire were actively backing with short crown runs and continue to back and flank south towards Tanana Village. Hay Slough, Harper Bend, Blind River, and Bering fires showed low growth.

Smoke cleared by early afternoon which allowed the team to get a critical GPS track on the south perimeter of the Spicer Creek, Harper Bend and Hay Slough fires. An indirect dozer line was completed from the Site Road going east towards Mission Creek Drainage. Water handling equipment was checked and improved for structures along the Upper Yukon and Tanana Rivers. Two new crews were transitioned into the Site and Mission Group Structure Protection organization. Water handling equipment was tested. The Blind River fire burned around another structure but fuel reductions around the structure prevented it from burning.

The fire is slowly but steadily progressing south along the Site Road in the direction of Tanana and is about .1 miles from Management Action Point #1. For the next shift low to moderate growth is expected on all fires with the current weather forecast. The possibility of northeast winds is a concern for the Site Road structure protection and could also cause spotting across Bear Creek north of the airport. The Spicer Creek Fire is expected to continue backing along both sides of the Site Road with the predicted weather.

Note: Staats` IMT managing 9 fires: The Blind River, Spicer, Tonzitna, Harper Bend, Hay Slough, Bering Creek, Moose Point, Jackson, and Kokrine fires. These are referred to as the Tanana Area Fires.

 #539 Owner: USFWS Unit: AKKUR-Koyukuk National Wildlife Refuge
 Name: **Holtnakatna** Cause: Lightning

The south end of the fire has reached a 2004 burn scar that will likely limit future spread to the south. There is still substantial heat and potential for growth in the southwest corner. Four smokejumpers were demobilized from Huntington Cabin. The fire is 2 miles to 2-1/2 miles north northeast of the cabin.
