Areas of needle cast are being monitored for reburn potential. More live standing timber are beginning to fall because of deep burning in the duff layer. Not only does this provide concerns for the safety of line personnel but also loss of containment. Planned activities for the next operational shift include holding and securing the north, northwest and west dozer line with assigned personnel and equipment. Continue to deploy water handling equipment.

The excavator was demobilized at end of shift yesterday. The Mat-Su crew worked on berms and hot spots again today. The crew and IC are no longer camping overnight at the fire. The crew will report to the fire from Palmer Forestry at the beginning of each operational period. The plan for the next operational period is to continue to work on hot spots found by the Palm IR and any other areas of concern. Transfer of command was completed at end of shift.
