Fire received precipitation last night but none today. Fire experienced high winds creating high potential for falling timber limiting suppression efforts. A helicopter flight was conducted to assess fire potential and protection strategy. Smokejumpers continued to evaluate the area for point protection opportunities. Fire is expected to be moderate due to favorable weather conditions. Predicted winds could still present problems for firefighters. Perimeter mapping, aerial observation and infrared imagery will continue.

Observed fire behavior is minimal with creeping and smoldering. Increased cloud cover, rain and high relative humidity values have moderated fire behavior significantly. Two hand crews, miscellaneous overhead and a T2 helicopter were demobilized today. Minimal fire may spread to the north along the Koyukuk at Long Bend moving towards Fish Creek, and on the southeast portion along Indian Creek in the Macaroni Creek drainage. Plans are to provide point protection for Hughes and adjacent values at risk along the Koyukuk River corridor and monitor fire spread and activity on the Isahultila #471 fire. Allotment protection north of Hughes has increased the need for river travel and personnel. This fire is part of the "Hughes Fires" and will be managed and monitored along with fire #471.
