Observed fire behavior was minimal with creeping and smoldering activity. Fire experienced high winds and no rain, creating high potential for falling timber limiting suppression efforts. A helicopter was used for the movement of personnel around the fire and to assess fire potential and protection strategy. Smokejumpers continued to evaluate the area for point protection opportunities. Fire behavior is expected to be moderate due to cloud cover, cooler temperatures and possible precipitation. Predicted winds could still present problems for firefighters. Perimeter mapping, aerial and ground observation and will continue.

Minimal fire behavior was observed. Increased cloud cover, rain and higher relative humidity have moderated fire behavior significantly. Minimal fire may spread to the north along the Koyukuk at Long Bend moving towards Fish Creek, and on the southeast portion along Indian Creek in the Macaroni Creek drainage. Plans are to provide point protection for Hughes and adjacent values at risk along the Koyukuk River corridor and monitor fire spread and activity on the Isahultila #471 fire. Allotment protection north of Hughes has increased the need for river travel and personnel. Midnight Suns IHC crew plan to demobilize on Wednesday. This fire is part of the "Hughes Fires" and will be managed and monitored along with fire #471.
