Palmer 911 requested Forestry respond to a structure fire with concern of spreading to wildlands. Upon arrival, Prevention found the homeowner had utilized their burn permit and lit an abandoned chicken coop on fire. Though the responsible party had a general burn permit, burning the structure was outside of the permit parameters, and a written warning was issued. The fire was contained, controlled, and placed in monitor status.

The fire was detected by a Modis spot in the morning, and verified shortly after by a private pilot flying in the area. Detection aircraft 909AK flew the fire and sized it up as 20 acres, creeping and backing into the wind, spreading towards the south and north. The fire was burning in tundra, and surrounded by sloughs and small ponds. Multiple allotments were identified in the area, but due to the proximity of the fire, and natural barriers in the area, none were immediately threatened. The fire plots in Limited protection, and will remain in monitor status.

The fire was reported by a residence of Tuluksak after hours on 6/1, as a lightning fire right outside of town. Due to all resources being off duty, the detection aircraft 909AK was launched from McGrath in the morning of 6/2. Upon arrival, the fire was sized up as 2 acres, with minimal fire behavior, and no smoke observed. The fire was four miles outside of Tuluksak, which was receiving no precipitation, and had light and variable winds. Due to the fire plotting in full protection, J-66 was launched from Galena and deployed four smokejumpers. The IC sized the fire up as 6.2 acres, burning in grass, brush, and hardwoods. Personnel will continue to work the fire through the night. Tentative demobilization is scheduled for the afternoon on 6/3.

The fire received a considerable amount of rain overnight. Four strike team leaders were mobilized to the fire to replace the five smoke jumpers that were demobilized during the afternoon. Crews and personnel continued to work towards their site protection goals. The plan is to push the crews south and west, mopping up any heat pockets that may cause an issue later on, and to keep the fire on the north side of the Kuskokwim River.
