	Name: Mud Creek		Cause: Human	

The fire was reported from three separate locals in the Candle, AK area. Each report claimed there was a large wind driven tundra fire in the vicinity of Mud Creek to the west of Candle. The smoke column was brown and white colored and moving toward the village rapidly. A jump ship was launched as well two Firebosses (scoopers) to the incident. Upon arrival, J-12 reported that structures were immediately threatened and the fire was wind driven and working it's way into Candle. Per duty officer request, J-12 went directly into jump operations and put 8 smokejumpers on the ground. The IC began working with the two Firebosses who arrived shortly after to knock down the head which was 100 yards away from the first structure. There were numerous structures and land at risk. The IC predicted that with the help of the Firebosses tonight, the head should be knocked down within the next 1-2 hours. The estimated acreage is 60.
