Personnel aboard surveillance aircraft 9VS flew the fire and observed active fire behavior. The fire was the most active in the northeast corner, flanking toward the cabin. There was no continuous crown fire, but there was steady group torching. The IC called dispatch at 1817 and said the fire was bearing down on them and they were going start igniting around the cabin. During the evening call the IC reported there is solid black around the cabin and the burn operation connected with the main fire. All personnel, gear and structures were accounted for.
