At 1500, Prevention responded to the area of mile most 78 of the Steese Hwy for a smoke report called in by an employee of the Montana Creek DOT station. Upon arrival, Prevention reported that smoke was visible from the road but that it would require a view from the sky for an accurate size up. Helitack was launched and reported a small, white column of smoke. The size up included burning in patchy grass and lichen, no visible flame, no resources threatened and no additional resources required. Helitack stated that the fire was on the edge of the Boundary fire burn scar. FMO requested helitack take no action and return to base.

Fire reported as a log deck was on fire and escaped into the wildlands. One structure was threatened. Two Forestry engines and Tok VFD responded. The log deck had to be dismantled using a backhoe to extinguish the fire. The wild land portion of the fire was extinguished by Forestry, and gridded. The fire will remain in monitor status.
These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
