Dispatch received multiple reports of increased fire activity. 9VS diverted to the fire and reported it at 300 acres, 100% active with spotting in black spruce and tundra. The fire was most active on the south side. Detection aircraft 222ME flew the fire and identified multiple structures in the area. A-4, J-12, T-55 and T-42 responded. Eight smoke jumpers were deployed for structure protection and retardant was utilized on the south side of the fire. If weather conditions allow, smokejumpers plan to conduct burnout operations 6/7.

Fire personnel observed the fire as creeping and smoldering with group torching. The structure group has been placed in monitor status, while the fire's Divisions continue to work steadily to ensure containment. Division F, maintains progress to secure the perimeter 150' in. Division S pursues securing the perimeter 50' in. Division T forges on, securing the perimeter up to 100' in. The weather is predicted to be hotter, with winds up to 10 mph out of the SE, giving fire personnel concern for unburned pockets spotting and the proximity to the line.
