 Name: **MP 308.5 Richardson Hwy** Cause: Human

At 1825, DOF received a report of a fire on the north side of the roadway at milepost 308 Richardson Highway. Caller stated smoke and flames were visible from the road and the fire was growing rapidly. DOF Helitack, DOF engines, and IA dozers responded and A/A, retardant, scoopers, and a load of jumpers by van were requested. Salcha VFD and AST responded also. Helitack arrived at the fire and reported 2.5 acres actively burning in black spruce with continuous fuels and winds out of the west. Helitack began bucket work and unified command was established with VFD. A subdivision 1/2 mile to the east and more structures 1/2 mile to the southwest were threatened and personnel began structure triage. The Richardson Highway was closed due to low visibility from the smoke. The retardant tanker and scoopers worked on the left flank and head of the fire. DOF personnel worked on right flank. VFD personnel worked small spots along the roadway. The dozer made good progress around the left flank of the fire from the heal and jumpers worked the left flank as well once aerial resources were released. Fire is currently at 15 acres. Two Type 2 IA crews and one Type 2 crew were requested and are now on scene.

The fire has received cooler temperatures and significant cloud cover with occasional precipitation. The fire is approximately 60% contained and the jumpers on the ground continue to work the interior of the fire. There are currently some hot spots caught up in willow brush that are planned be taken care of by the end of the next operational shift. The fire perimeter was mapped at approximately 4.3 miles and was called contained at 2000. There are no critical needs or requests for this fire, at this time.

Contract aircraft N864SF did a recon flight and reported the fire to be active on the southwest corner and the east side in the hills. A short squad of 6 Midnight Sun crewmembers were put in place by H-920. IC (T) reported that fire activity is low, the edges of fire is cold, there are several interior areas putting off heat and smoke and moving up slope. Will plug in personnel at areas of heat tomorrow, and will utilize helicopter to transport personnel across fire to other hot spots; which are very spread out. A/A N44NC and Firebosses 242 and 243 responded to fire.

The fire was flown earlier in the day by 222ME. It was reported to be 13,000 acres with a 2% active perimeter burning in a patch of tundra on the south. The fire was smoldering and creeping with 1 foot flame lengths. The Nondalton #2 crew was mobilized to this fire in the afternoon. They stated the fire had received precipitation and the behavior had moderated from previous updates. The plan for the next operational period is to scout the town and various structures to come up with a protection plan.

The fire was flown by N864SF. The fire is burning at a low rate of spread to the north. No visible smokes reported on the east and south perimeter. Personnel on board reported that the fire's edge is still 5 miles from allotments to the northeast, 4 miles from an allotment to the east and 2 miles from allotments to the southeast. 2 Firebosses and Air Attack 4NC were dispatched to this fire initially but later shifted their efforts to fire 192, where ground personnel could effectively support the water drops.

As a result of the moderate rate of spread, Fire 185 has consumed fire 181. 185 will remain the parent fire as a result.
