The fire showed active behavior today with short crown runs and group torching. CL-415's and T-55 were used to provide continuous water drops to assist the ground forces with holding and creating line. Temperatures were cooler bringing higher humidity but no precipitation to the area. Objectives remain to reinforce the lines on the west and south sides of the fire to protect infrastructure in the area and allow the fire to continue to burn unchecked to the northeast. All four crews have been shuttled to the fire to assist in operations.
