Fire discovered by smokejumper aircraft J-66 while en route to fire 322. Upon discovery the perimeter of the fire was 20 percent active, burning on the upper 1/3 of a hill and was approximately 1 acre in size. Being in a Limited suppression area, the fire area will continue to be monitored by aircraft.

A two acre fire was discovered by helicopter 580SH while flying to Chalkyitsik. The fire was reported as smoldering and creeping with a 20 percent active perimeter burning in a spruce fuel type. Fire plots 12 miles south of Chalkyitsik in a Modified suppression area. Smokejumper aircraft J-66 responded and deployed 8 smokejumpers. Helicopter 911CV dropped multiple loads of water on the fire to help support personnel on the ground. Smokejumpers were able to establish an initial containment line around the fire perimeter and will work to improve it tomorrow. A helispot was constructed and supplies were delivered via paracargo. Tomorrow resources will continue to check the areas where the fire may have spotted outside the perimeter.

 Name: **Hadweenzic** Cause: Lightning

Resources on scene spent the majority of the day extinguishing hot spots located in the interior of the fire. No other hot spots were located outside of the fire perimeter when personnel expanded their search for heat. Tomorrow the green areas outside the fire perimeter will be surveyed again and a final check for heat will be performed. Demobilization of this incident is scheduled for the afternoon of 7/9.

Fire behavior increased on the NE and SW portion of the fire today. The Chena IHC improved the line near the Vundik Lake allotment. The closest part of the fire is 5 miles away. Two loads of smokejumpers were deployed to protect an allotment on the Sheenjok River. The North Star crew will mobilize to the fire on 7/9. Several fire recons are planned during the next operational shift. New perimeter digitized from VIIRS I-Band data shows an increase in acreage.

 Name: **Kihovilik Creek** Cause: Lightning

Reconnaissance aircraft N864SF reported the fire is backing to the north along the northern perimeter in multiple areas through the hardwoods and brush. There is one small area on the southwest corner that is creeping and smoldering. Fire is moving at a slow rate of spread. This fire will remain in monitor status.

 #273 Owner: NPS Unit: AKGAP-Gates of the Arctic National Park and Preserve
 Name: **Narvak Lake** Cause: Lightning

With new MODIS dots appearing on the map, N864SF flew the fire and discovered two main areas of the fire burning. On the south perimeter, one small area is backing down the slope, into brush. Further along there is a riparian and drainage area towards the bottom of the slope that it will likely get caught up on. Meanwhile, the NW corner continues to burn up the canyon to the west and south at a slow rate of spread. Altogether, the fire will eventually either run into Narvak Lake, drainage/riparian/creek areas, rocky and snowy terrain, or a small pond residing upslope from the fire. Acreage is expected to increase and will remain in monitor status.
