 Name: **Bear Mountain** Cause: Lightning

Fire identified by remote sensing. Zone aircraft N9011N located the fire and reported it as 100 percent active with a continuous crown fire, running and spotting up to 500 feet in front of itself. Weather in the area was reported as 100 percent cloud cover with east winds and no precipitation. No values at risk were identified from the fixed wing aircraft. This fire plots in a Limited suppression area and has been placed in monitor status.

 #292 Owner: USFWS Unit: AKYFR-Yukon Flats National Wildlife Refuge
 Name: **Boulder Creek** Cause: Lightning

Eight smokejumpers were demobilized from the incident early today and the Northstar Type 2 handcrew arrived on scene to bolster forces on the allotment. A reconnaissance flight was taken in a helicopter to map distances from the fire and the allotment. A UAS (unmanned aircraft) was used by the Chena IHC to gather better intelligence on the fireline. Fire behavior was reported as less active due to the lower temperatures and higher relative humidity. Much of the fire was sheltered by cloud cover which slowed fire progression. New satellite data showed an increase in the fire size. Plans for tomorrow include the reassignment of the White Mountain Type 2 Initial Attack hand crew. Resources on scene will continue to improve sawline on the Sheenjek allotment and prepare the sprinkler systems and hose near the Vundik Lake cabins.
