Fire was flown by zone aircraft N9011N at 1645. The fire was reported as 30 percent active. The most active parts of the fire were located on the southwestern edges. The fire's perimeter is currently 1.3 miles from the Salmon Trout allotment and 4 miles from the nearest structure. Behavior was described as backing, running, torching with continuous crowing. Two personnel from the structure group repositioned to the allotment, where some initial firing was conducted. Late in the evening favorable conditions materialized at the allotment site and resources on scene conducted a firing operation. Plans for tomorrow include monitoring fire behavior near the structure and monitoring effects of the firing operations.

Due to weather conditions not being optimal for burn out, it was postponed to tomorrow but may be modified if some smokejumpers are demobed from the fire. The fire was reported making a good run today, pushing hard to the south then turned back north, and it finally calmed down. The fire did receive some precipitation and the fire has now pushed south up into the hills. The weather will be watched overnight to determine if and/or what option the burn out will have. Also, depending on the needs for the state, a group of smokejumpers may be demobed to be made available for IA.
