The fire was discovered by zone surveillance aircraft N309VS. It was sized up at 1/2 acre and had a 60 percent active perimeter, smoldering and creeping in an old burn on a valley bottom. Observations were taken under 30 percent cloud cover with winds out of the southwest at 10 mph. The fire was placed in monitor status.

Personnel on scene completed a helispot and continued to reinforce sawline. A delivery of essential supplies was received via paracargo and helicopter N405AE repositioned 4 smokejumpers from fire 337 to this incident. The helicopter also provided support with water drops in the afternoon hours. The fire is burning deep and resources are using a large blivet filled with water to aid suppression efforts.

At 16:00 zone surveillance aircraft N309VS flew the fire and reported it with a 70 percent active perimeter, backing and running with group torching in a spruce and hardwood mix. The northwestern portion of the fire was the most active and it was spotting up to a 1/2 mile. Observations were taken under 40 percent cloud cover and winds out of the southwest at 10 - 15 mph.

Personnel on the fire completed a heli-spot and saw line around the cabin site. Sprinklers were set up and tested. Supplies were received via paracargo. At last report the fire had grown substantially and it was now reportedly within 1 1/2 miles of the cabin.

Personnel utilized zone helicopter N911CV to conduct a reconnaissance flight over the fire area. A few smokes across the Salmon Trout Creek were observed on the edge of the black. The Fort Yukon #2 crew and the Fire Familiarization group mopped up 50 feet into the black on the south and east flanks. The plan for tomorrow (7/18) is for the crew and personnel to mop up and secure line deeper around the allotment.

Personnel on the ground observed moderate activity on the fire. It was creeping with group and isolated torching on the western flank. Due to erratic winds, the burnout operations were postponed. The winds were gusting out of the south and expected to push the fire to the north. The fire received no precipitation. Surveillance aircraft N864SF flew the fire in the afternoon and reported that it is now approximately 1.2 miles from the allotment to the north. Plans for the next operational period are to patrol the fire line and wait for favorable conditions for a burnout operation.

Zone aircraft N9011N flew the fire and reported a 50 percent active perimeter with smoldering, creeping, backing and some group torching. When the fire was last flown there was significant smoke impacting visibility. Personnel on board reported evidence of significant rainfall. The fire has five, one acre patches of blow down and very damp white spruce, which surround the 5 acre spot fire located east of Montauk Lake. The spot fire is 40 percent active, smoldering in a spruce and harwood fuel type.
