Fire was reported by local resident. Multiple structure fire on allotment spread to wildland. Alaska State Trooper conducted investigation. N32AT, N361EH, 2 FS along with 2 zone personnel responded. Fire was burning and backing in leaf understory and slash with 1 foot flame lengths on flat terrain. Completed some bucket work, put in a hose lay and mopped up. All resources came off the fire and will return Sunday to check it.

Hot, windy, smokey conditions presided over the fire area today. Personnel on the ground reported a smokey interior and active fire behavior on portions of the fire. Fire is not yet established in the flats but remains on the hillside. Smokejumpers initiated burnout operations in the evening to protect the cabin on the Nowitna River. Two large columns prevented visibility across the fire for detection aircraft N309VS. Estimated growth at 2000 acres.

The Fort Yukon #2 crew spent the day searching for areas of heat. The crew did not locate any heat within 300 feet of the fire's perimeter. Several UAS Infrared flights were conducted in the morning and evening hours to locate any heat signatures. One spot of residual heat was detected within a peat layer on a river bank. This hotspot is located 1000+ feet from the fire's edge. The AFS Fire Familiarization Program personnel worked near a cabin site to restore the area to its original state by moving equipment and supplies elsewhere. Tomorrow helicopters will be used to shuttle excess supplies back to Fort Yukon to prepare for demobilization.

Fire behavior at 1520, active on the northwest flank, running in black spruce and wind driven. At 1830 fire was backing through tundra meadow and spruce. There were lots of trees coming down due to deep burning conditions. Western edge is .6 miles from allotment and 1.4 miles from cabin. If weather forecast proves to be true fire should not reach the allotment. Personnel secured perimeter 60-80% and continuing mop up to 200' in. Anticipate demobilization by Tuesday if significant precipitation is received.
