The fire was observed by modis dots in the morning. Forestry contacted Kongiganak Traditional Council, and they confirmed that locals were working an out of control dump fire. J-07 was deployed from McGrath, and while they were en route, locals called Forestry to request more assistance. Upon arrival, J-07 sized the fire up as 8 acres, 60% active, escaping into the tundra. Four jumpers were deployed, and they began suppression efforts. Due to winds blowing hazardous smoke over part of the fire, 83230 was launched from Aniak to provide bucket assistance. In the evening, IC reported that the fire was 15-20 acres with the head knocked down, and the right flank secured. Due to the winds and toxic smoke, personnel were unable to walk the whole perimeter. Plans for tomorrow consist of seeing what the winds and heat of the day bring to the fire, and reevaluating objectives as needed.

The fire continues to spread to the south and east with active fire behavior observed. The Northstar Crew and smokejumpers continued with point protection of the values at risk in the area which include two cabins, a radio tower, and a mine equipment site. Efforts today focused on prepping the allotment and preparing the hoselay plan. The closest value at risk is a USFWS cabin on the Koyukuk River approximately 2.4 miles to the west of the fire. Helicopter 920 is supporting resources and their efforts.
