Today the Pioneer Peak Crew gridded two-thousand feed in on the northern edge of the fire. Drone operations helped identify areas of heat. The Yukon Crew gridded to the south and found one hot spot about three-hundred feet in. They will continue to work a large finger to the east. Upper Kalskag built a medivac helispot and continued gridding. Fire personnel will continue gridding the fire 6/15.

Strong frontal winds out of the west pushed the fire 7 miles to the northeast overnight to within 4 miles of allotments and structures on the Tanana River and Kindamina Lake. Though high winds and smoky conditions hampered efforts to deploy personnel, eventually 14 Smokejumpers were inserted into Kindamina Lake, with another 4 in place on the Tanana River preparing to receive crews for allotment protection. Strong gusty winds continued throughout the day pushing the fire within a 1/2 mile of the Lake. Retardant drops were used to provide a buffer around numerous structures on the lake. The Midnight Suns were mobilized to support fire operations today with an additional Type 1 and Type 2IA Crew expected to mobilize tomorrow. A Temporary Flight Restriction was put into place over the fire area. A type 3 organization is being put into place to manage this fire and the Mooseheart Fire (204).

The fire continues to spread to the south and east with active fire behavior observed. The Northstar Crew and smokejumpers continued with point protection of the values at risk in the area which include two cabins, a radio tower, and a mine equipment site. Efforts today focused on prepping the allotment and preparing the hoselay plan. The closest value at risk is a USFWS cabin on the Koyukuk River approximately 2.4 miles to the west of the fire. Helicopter 920 is supporting resources and their efforts.
