At 1849, an employee at the Bornite Mine reported a wildfire burning 5 miles south east of the mine. The fire was approximately 2 acres in size and creeping in open tundra and black spruce. At 2005, detection aircraft N864SF flew over the fire and observed the fire at approximately 5 acres with an 80% fire perimeter. Due to the conversion date, the management option is in Limited. However, due to the close proximity of values at risk, it was determined that action needed to be taken.

At 2205, the fire had grown to 9 acres. Two smoke jumpers were deployed to the fire by Jump-17. Smoke jumpers will work towards 100% containment.
