The fire was reported by Matcom as an unattended brush pile that escaped into the brush. Two Forestry engines and Prevention responded and found an unattended brush pile that had burned into the adjoining alder brush. The escaped fire was extinguished. Once equipment and water was on scene, the burn pile was turned over to the land owner.

At 0900, the fire was discovered via modis spots. At 1030, Zone detection aircraft N864SF discovered the new fire at approximately 25 acres in size, with a 100% active fire perimeter. The fire is creeping and smoldering in black spruce and hard wood mix. The fire is located in a Full suppression management area. It was determined that due to steep terrain, lack of water sources, and thick fuels, that action needed to be taken. Values at risk are the village of Hughes which is four miles east of the fire.

J-17 deployed 6 smoke jumpers on the fire; two additional smoke jumpers were mobilized off Fire 360. Tanker 142 dropped one load of retardant on the heel of the fire while Fire Boss-208,209,242 and 243 worked to keep the fire perimeter in check. Aerial Supervision was provided by 35E and Alpha 4.

The fire transitioned to a Type 3 IC today. One additional crew arrived on scene (Northstars) along with a Type 2 Helicopter for crew shuttles and to assist with point protection of nearby allotments. BD 840 and Tanker 42 assisted with a retardant drop. Significant growth was witnessed due to hot and dry conditions. It is now estimated at 4000 acres. Plans for the next operational period include shuttling crews into nearest allotments to cut line and set up hose lays. A mapping mission is also planned for the afternoon.

Extremely hot and dry conditions over the last 48 hours resulted in large fire growth on the southeast corner of the fire. Approximately 15,000 acres of new fire growth have been observed. The fire made a push onto the west side of Kindanina Lake where firefighters were in place for structure protection. A Type 2 squad will be mobilized to replace smokejumpers for tomorrow's operational period to mop up and secure fire edge around structures.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.

Fire was reported on 7/23 by NPS employee as 0.1 acres smoldering in black spruce and birch. The fire plotted in a Limited Protection area and was placed in monitor status. Due to site values at risk, a non-standard response was requested. Four smokejumpers were inserted to suppress the fire. A wind shift occurred increasing fire behavior beyond the suppression capabilities and all resources were extracted to transition to a point protection strategy.
