Hot temperatures, very steep inaccessible terrain, thick fuel and white spruce blow down have made mop up efforts challenging. Smoke jumpers continue to work the fire with the assistance of FB-208, 209, 242, and 243 working to keep a wet perimeter all around the fire. There was a significant decrease in fire growth and activity within the interior of the fire due to aerial support and a recovery in relative humidity levels in the late afternoon. Aerial supervision was provided by A/A 35E and A-4.

The plan for tomorrow's shift is more chainsaw work to secure the perimeter and cut out new helispots.
