Smoke jumpers made significant progress on the lines and worked to extend their hose lay along the right flank. J-07 deployed 8 additional smoke jumpers to assist with suppression efforts. A new helispot was created on the south end of the fire and saw lines were extended farther interior. H-361EH delivered supplies to the line and mapped the fire at 46.0 acres. There was minimal precipitation over the fire and more significant fire behavior was observed due to warmer weather and strong winds blowing out of the south/southwest. The fire continues to burn in heavy blow down timber and tundra. Fire Bosses 242 and 243 were utilized on the left flank of the fire while smoke jumpers focused on the right flank. Aerial supervision was provided by A/A 35E. Smoke jumpers continue to keep the fire in check. Lack of water, blow down timber, and inaccessible terrain continue to make suppression efforts a challenge.

The plan for tomorrow is to improve existing fire lines, create new helispots, and tie in the hose lay around the fire perimeter.

Established a long term strategy plan and held a public meeting for the Village of Northway. Staffed an additional two allotments for site protection. Performed a test fire on an allotment with less than desired results because of weather changes in the afternoon producing higher RH values. Water levels increased making it difficult to access allotments. Next shift will continue to prep allotments, attempt burnout operations if conditions allow and continue assessments identified in the long term strategy plan. Will establish a command repeater because of communication gaps hampering fire operations. The fire had moderate growth with a run of approx 1 mile to the north. Fire est. 15000 acres
