There was no new growth of the fire. The fire received precipitation overnight; however, multiple deluges failed to extinguish deep seated ash pits. Fire behavior was observed as creeping and smoldering. Gannet Glacier crew continued to make progress securing the perimeter. Supplies and fresh food were delivered to the fire by H-621SH. Hazardous tree removal continued.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
