Aerial reconnaissance of the fire took place in order to monitor fire activity. Safe access to existing control lines north of fire perimeter have been identified which are critical due to the extensive UXO hazards in the fire area. The IMT created plans for potential suppression operations and is prepared to implement the plans should the need arise. The White Mountain T2IA crew was staged for any potential suppression efforts on the fire as well as initial attack support for the BLM Military Zone. The IMT finalized strategic planning for long-term operations if the fire presents a threat during the remainder of the fire season. This strategic plan will be briefed to relevant land managers and agency administrators on 5/10/19.

Crew: White Mountain

Type: T2 IA

Assigned: 05/07

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
