104 Name: **Bear Lake** Cause: **Lightning**

Fire detected by N700FW at approximately 1700. J-12 responded, and deployed 8 smokejumpers to suppress the fire. Fire is 23.5 acres, burning in grass, tundra, and black spruce. 10 food flame lengths were observed, with a moderate rate of spread. Smokejumpers worked through the night to suppress the fire, and suppression activities will continue in the morning.

102 Name: **270 Richardson Highway** Cause: **Human**

A concerned citizen called in a smoke column near the Motel 7 on the Richardson Highway. Two Forestry engines, the Delta Volunteer Fire Department and the Rural Deltana Volunteer Fire Department responded. Upon arrival, Forestry found several vehicles and a trailer on fire which were spotting into a field due to high winds. Forestry fully extinguished 4 separate spot fires and the Volunteer Fire Department suppressed the vehicles and structure. After an investigation was completed, it was found that an unpermitted debris burn was the cause of the fire. The fire has been placed in monitor status.

The IMT briefed the strategic plan it developed to relevant land managers and agency administrators today. As a result of that briefing, the IMT is initiating suppression operations on the fire. The fire is still entirely located within a military impact area which is off limits to ground and air suppression resources due to unexploded ordinance in that area. Suppression operations will consist of limited burnouts along a previously created control line immediately to the north of the fire in order to prevent the fire spreading north of this control line. Based on current weather conditions and forecasts, this will begin on 5/12/19. The White Mountain T2IA crew was staged for any potential suppression efforts on the fire as well as initial attack support for the BLM Military Zone.

Additionally, the IMT will work on mitigation plans for land managers in order to prevent fire spread north of the primary containment later in the fire season as additional fuels become ready to burn after seasonal green-up.

Crew: White Mountain

Type: T2 IA

Assigned: 05/07

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
